

Installing and Setting Up PRAW

Install and Upgrade using the commands:

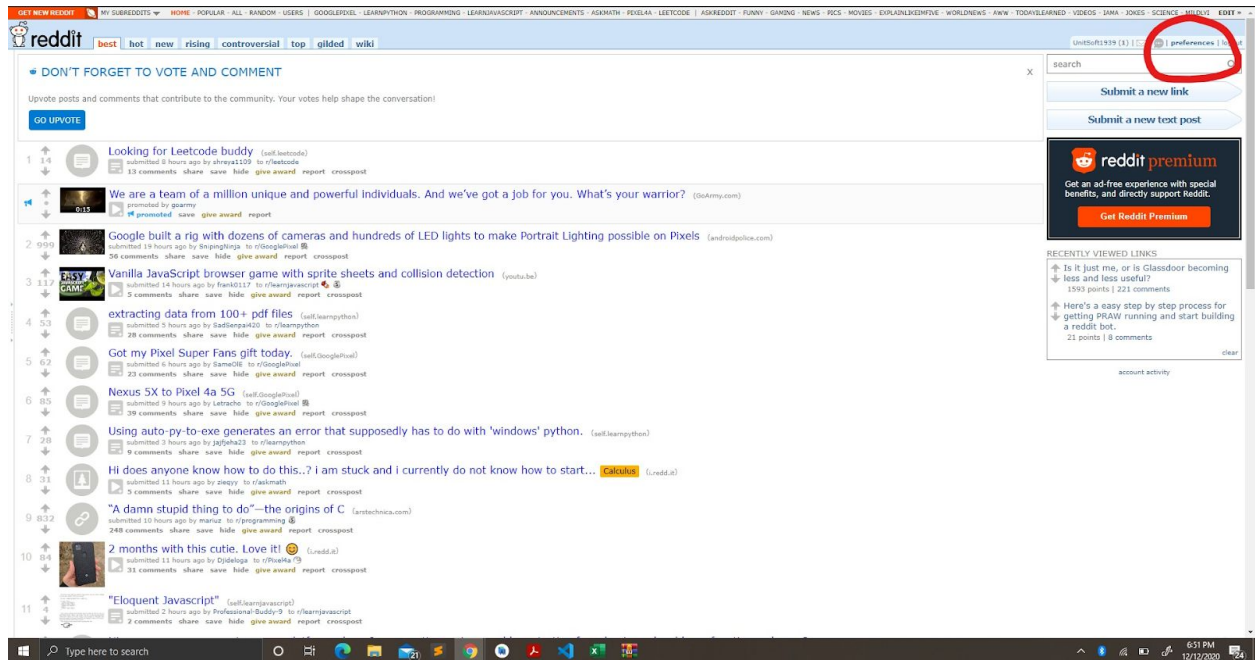

- `pip install praw`
- `pip install --upgrade praw`

Sign Up and Register on Reddit

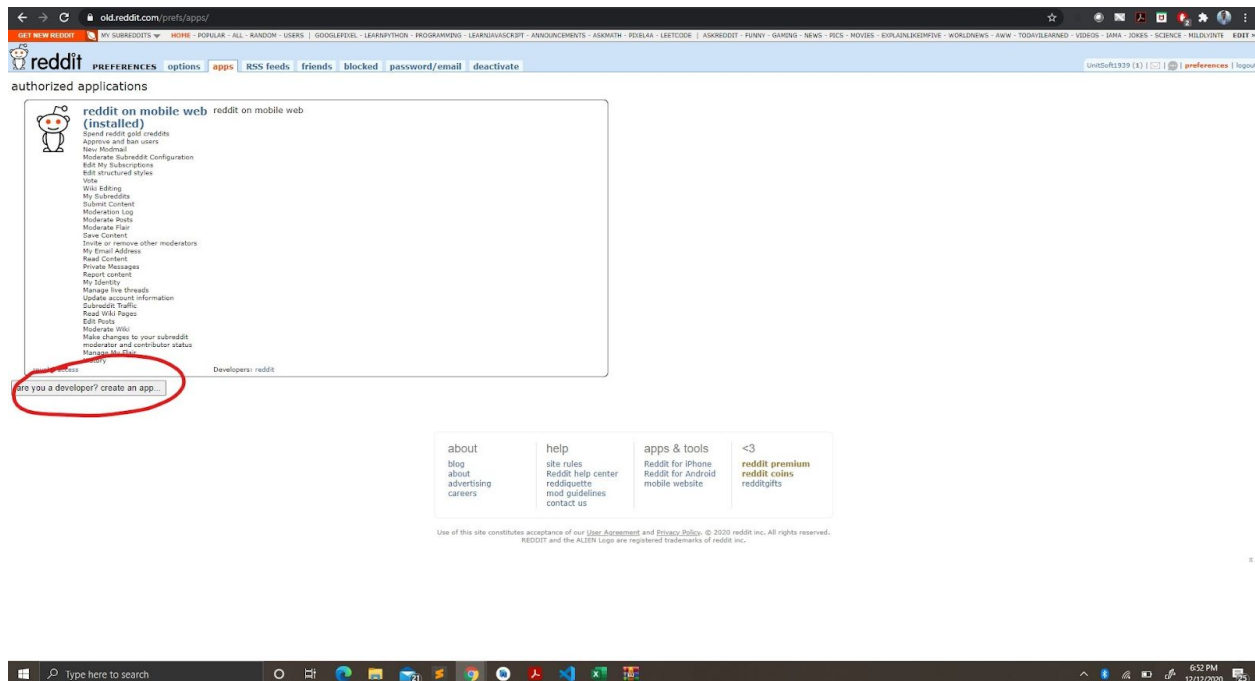

- Login to your reddit profile. If you do not already have one, sign up.
- On the Reddit Homepage, click on the icon beside the profile pic on the top right corner. Select “Visit Old Reddit”

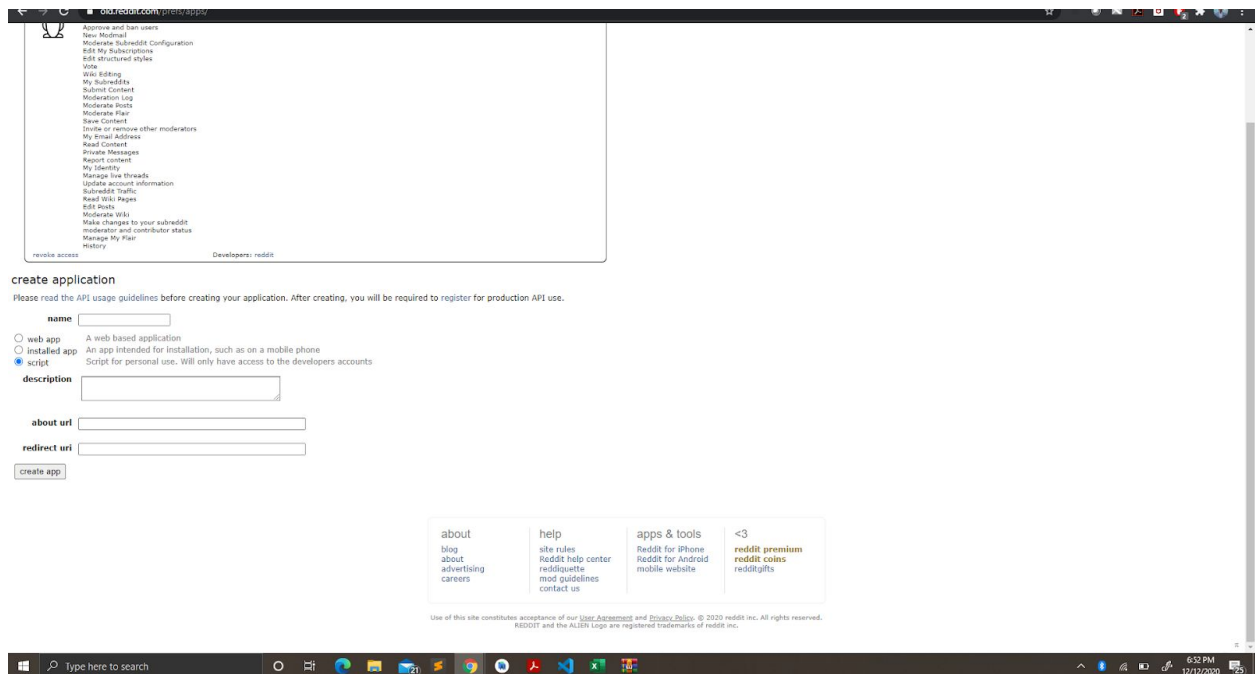

- Go to “preferences” on the top right corner.

- Go to the “apps” section in the nav bar and click on the button “are a developer? Create an app”

- Fill all the required details and select “script”. Click on the “Create app” button.

- You will be redirected to a page where personal use script and security token will be given. These will be required in the Python script.
